Sprint 1 - Report

Actions to stop doing:
Team members should stop letting each other know at the last minute if they cannot make a meeting, since our meeting times are limited and valuable.

Actions to start doing:
The team should start replying to messages about scheduled meetings, affirming that they can go, or not go, since we need to meet regularly to meet our deadlines.

The team should start a scrum board to keep track of the progress others are making on tasks since we want to avoid working on the same thing and we want to know what needs to get done.

The team should start sending messages to the discord when they push to main, since we want to avoid merge conflicts.

Actions to keep doing:
The team should continue to meet in person or online to write code together, since collaboration helps our productivity.

Work completed:
Setup work environments such as Github, React, and VSCode. Studied Javascript and how it is used inside of React to produce applications. Designed and implemented the UI for the login, title, and register pages (the login and title page became one). Designed and implemented the UI for the "Create Habit" page and implemented early versions of the buttons.

Story 1:
Task 1: Design UI for title page, login page, register page - 1.5hrs
Task 2: Implement UI for title page - 2hrs
Task 3: Implement UI for login page - 2hrs
Task 4: Implement UI for register page - 1hrs

Story 2:
Task 1: Design UI for "Create New Habit" page - 1hrs
Task 2: Create layout for UI for "Create New Habit" page - 3hrs

Task 3: Implement various buttons for "Create New Habit" page - 3hrs

Work not completed:
Storing habits locally, removing/editing current habits, processing the data that deals with these habits. Deciding on a color scheme and refining the look of the UI.

User story: Task 4: Store habits (locally), remove/edit current habits, process data

Work completion rate:
75%.

Stories completed : 2. Work hours: 14. 14 days.
